INDEX TO VOLUME 31

Acid and pH variations in *Ananas comosus* Merr. in relation to swells caused by *Clostridium Sp.* Abstract 85
Action, The, of aldehydes on certain cultures of *Streptococcus liquefaciens* in milk 479
——, The, of formolized virus as a preventive of experimental equine encephalomyelitis in guinea pigs. Abstract 38
Advantages, The, of vacuum dried complement for use in the routine Wassermann reaction. Abstract 439
Aerobacter and "intermediate" strains, Variations in the electrophoretic mobilities of escherichia 211
Aerobic, The, dissimilation of lactic acid by the propionic acid bacteria 595
Agglutination, The, reaction in the classification of spore-forming anaerobes. Abstract 321
Aldehydes, The action of, on certain cultures of *Streptococcus liquefaciens* in milk 479
Alexander, W. F., and Milone, Nicholas A. The significance of the escherichia-aerobacter group in pasteurized milk. Abstract 574
Alfalfa, Bacteriophage as related to the root nodule bacteria of 465
Allison, Franklin E. and Hoover, Sam R. The stimulation of rhizobia by natural humic acid. Abstract 94
Allison, Franklin E. and Ludwig, C. A. Experiments on the diffusion of nitrogenous compounds from healthy legume nodules or roots. Abstract. 93
Almaden, Philip J., Mellon, Ralph R. and Richardson, Ruth D. Antigenic relationships of a new cyclostage (the critical R) of the tubercle bacillus. Abstract 75
Anaerobic bacteria, Studies on. IX. Antigenic relations of *Clostridium bifermentans* and *Clostridium centrosporogenes* 557
Angevine, Murray. Hypersensitivity and immunity in streptococcus infections. Abstract 635
Antibody, The, content of acute poliomyelitis cases as compared with normal individuals. Abstract 36
Antigenic composition and immunological behavior of hemolytic streptococci—a progress report. Abstract 571
—— relationships of a new cyclostage (the critical R) of the tubercle bacillus. Abstract 75
Antigenic, The, and pathogenic characteristics of *Brucella abortus*, United States Bureau of Animal Industry strain nineteen. Abstract 107
——, The, relationships of *Salmonella aertrycke* var. binns. Abstract 43
Antituberculosis, An, serum of high antipolysaccharide titre. Abstract 101
Aplington, Sophronia and Falk, Carolyn Rosenstein. Studies on the bactericidal action of mixtures of phenol and merthiolate. Abstract 8

Apparatus, An, for collecting bacteria in the stratosphere. Abstract..... 27
Apparently, An, new type of intestinal gram-negative rod antigenically related to both typhoid and dysentery organisms. Abstract..... 569
Aronson, Joseph D., Henderson, Howard J. and Long, Esmond R. Studies in the bacteriology and immunology of leprosy. Abstract..... 41
Atmospheres of hydrogen, carbon-dioxide, and oxygen, respectively, and of mixtures of these gases, on the growth of *Bacillus subtilis*..... 151
Attempts at vitamin C therapy in experimental poliomyelitis. Abstract... 34
Autolyzing tissue, The rôle of bacteria in..... 191

Bacilli, Gram-negative, of the genus bacteroides..... 255
Bacillus subtilis, The effect of atmospheres of hydrogen, carbon-dioxide, and oxygen, respectively and of mixtures of these gases on the growth of... 151
